

CASE STUDY

WORSHIP & CLASSROOM FACILITY

KEY FACTS

PROJECT NAME

Worship & Classroom Facility

LOCATION

Southwestern USA

SUNBELT FACILITY

Phoenix Modular

PROJECT TYPE

Church Lobby & Classroom Facility

BUILDING SIZE

3,168 sq. ft. (2 buildings)

UNITS

1 Lobby +
1 classroom structure

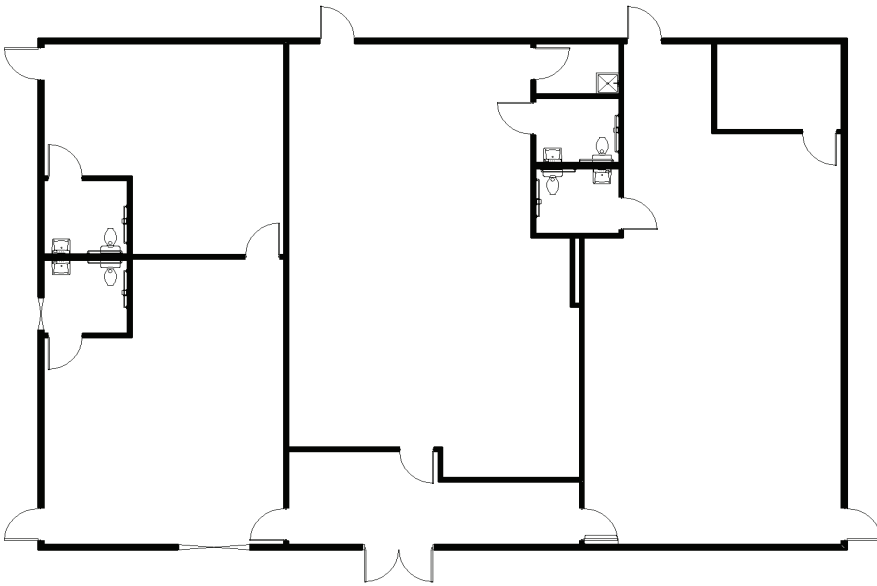

Phoenix Modular partnered with a Sunbelt Modular dealer to deliver a 3,168 sq. ft. modular church lobby and classroom facility for a church in the Southwestern USA. The project includes two separate buildings: a main assembly space for worship services and a dedicated classroom structure, designed to support both spiritual gatherings and educational programs.

This flexible modular solution provides the congregation with a modern, efficient facility that can grow alongside its community. The project highlights the adaptability of modular construction for religious institutions—delivering functional, welcoming spaces faster and more cost-effectively than traditional methods.

WORSHIP & CLASSROOM FACILITY

BUILDING FLOOR PLAN HIGHLIGHTS

- Dedicated worship assembly hall lobby
- Separate classroom facility
- Flexible, multi-purpose design
- Modern finishes with long-term durability
- Functional layout for community use

KEY ACHIEVEMENTS

Fast-track modular solution tailored for a growing congregations

Cost-effective alternative to traditional church construction

Reduced material waste compared to traditional builds

Combines worship and classroom functions in one project
